The Cost Action Greenering network continues to evolve with now more than 250 participants from 36 countries. New events were organized: an entrepreneurship course was held online, the Greenering webinar series went on with a webinar about NADES applications. The most significant event was the scientific meeting joint with the IEFS 2022 which took place face-to-face in Portugal. The participants had the pleasure of meeting again and network, in the nice city of Coimbra, after two years of pandemic.

Entrepreneurship course

Bringing a breakthrough technology to the market is not an easy challenge and in the case of sustainable technologies several specific aspects should be taken into account. Focusing on these technologies, the 1st Greenering Entrepreneurship Course addressed: Process of Innovation Development; Idea Generation Techniques; Business Model CANVAS methods and Elevator Pitch; Understanding Financial Statements; Cash Flow Forecasts and Economic Evaluation.

This 6-days course was held online from November 15th to November 22nd and had 16 participants divided into 6 teams corresponding to 6 technologies: Verde Agua R&D, CarMaVall, NADESDesign, SINTEF youth, Supercritical CO₂ extraction, DEASYL SA.

Greenering webinar When Industry meets Academia

Thank you to Alexandre Paiva from the company DES SOLUTIO (Portugal) and Anastasia Detsi from the National Technical University of Athens (Greece) for their presentation about Natural Deep Eutectic Solvents (NADES). The exchange was chaired by Ana Rita Duarte, the leader of the Cost Action Greenering. The video of the entire interview is on the Greenering You Tube Channel: <https://www.youtube.com/watch?v=GjDiFNr8aFI>

Joint and scientific meeting in Coimbra

The scientific Greenering conference was joint with the EIFS 2022 and was held in the Faculty of Science and Technology of the university of Coimbra (Portugal) from February 28th to March 2nd. The event was organized by Ana Rita Duarte, Ana Nunes, Alexandre Paiva, Ana Pereira, and Mafalda Sarraguça.

There were 16 high scientific level talks from senior and young researchers, PhD students, and Early Career Investigators. It was a great pleasure to meet again!

Save the date Greenering training course

The training course "Green Engineering by High Pressure Technology" organized by Thomas Gamse, under WG3, will be held from July 3rd to July 10th 2022 at the University of Maribor, Slovenia.

More information soon on the website.
